

She's a gypsy, going where she pleases
She's a temptress with her caresses and her teases
She's a whirlwind and she's stirring up my fire
She's a dear friend and she always takes it higher

So spin me round, lift me up, fill up all my sails
Blow me down, shake the walls, listen to you wail
I know your every breath from a gust up to a gail
To feel you blowing at my back, I know im never gonna fail

She speaks her mind, always does it her way
She can be so kind, when you catch her on that sunny day
She can be so cool, you'll wonder if she freezes
She can be so warm you'll think that you found Jesus

So spin me round, lift me up, fill up all my sails
Blow me down, shake the walls, listen to you wail
I know your every breath from a gust up to a gail
To feel you blowing at my back, I know im never gonna fail

She's a hurricane, blowing down the highway
She's a big change, pushing the clouds away
She's a godsend, and she's carrying up what I pray
She's around the bend and I hope that she blows my way
